2009-2014	Capability Development Engineering, Component Services
2014-2018	Head of Tool & Equipment Engineering, Aircraft Services
2018 – present	Repair Project Engineering, Engine Services

About me:
I am 55 years old, live in Seuzach together with my two sons, enjoy skiing, biking and motorcycling and I am also learning to play guitar.

Motivation: For me and for all of you, our pension provision is the most important financial pillar next to our salary. Nevertheless, many insured persons know little about what happens to their retirement capital and who decides on it.
I want to deepen this knowledge and help to ensure that our pension fund is managed safely, fairly and comprehensibly in the long term.

Goals and priorities:

1. **Reliable pensions:** Our benefits are securely financed, changes are explained early, understandably and fairly.
2. **Carefully invested money:** Our contributions are invested with a sense of proportion and at low costs.
3. **Expertise:** I am constantly educating myself and questioning expert recommendations critically but constructively.

Replacement election of the Board of Trustees 2026
Remaining term of office 2025-2028
